Brian Gasca

619-484-1924 | gasca.brian11@gmail.com | linkedin.com/in/brian-gasca | github.com/briangasca | San Diego, CA

Education

University of California, San Diego Jun. 2023 – Expected Jun. 2027
B.S. Computer Science — GPA: 3.6 / 4.0 *La Jolla, CA*

- **Coursework:** Data Structures & Algorithms, Software Engineering, Operating Systems, Systems Programming, Computer Architecture, Theory of Computation, Data Science in Practice

Experience

Software Developer, ServiceNow Platform Jan. 2026 – Present
University of California, San Diego *La Jolla, CA*

- Write client and server side **JavaScript** (business rules, Script Includes, UI policies) driving form logic, validation, and workflow automation for a platform serving **40,000+** students and staff.
- Built **async data-fetching** layers and ETL import pipelines processing **100,000+** records with field coercion, deduplication, and error handling; integrated external systems over **REST APIs** with **OAuth 2.0**.
- Developed responsive **Service Portal widgets** with HTML, CSS, and client/server JavaScript, delivering custom request interfaces and dashboards used daily by campus support staff.

Software QA/Development Intern Apr. 2026 – Jun. 2026
LOST iN *Remote*

- Contributed to full-stack development of lostin.com, the e-commerce platform for LOST iN, an award-winning travel brand.
- Tested and logged bugs in code shipped by senior developers, helping drive features to production-ready status.
- Supported REST API integrations and frontend edits across the site.
- Reproduced and triaged production bugs with severity classification and reproduction steps.

IT Automation and Project Management Jun. 2025 – Jun. 2026
University of California, San Diego *La Jolla, CA*

- Designed and deployed an **LLM-powered AI agent** that summarizes activity and writes records via the **Jira REST API** daily across **200+** projects, cutting reporting overhead for **50+** team members.
- Developed **Python** automation scripts for data cleanup and scheduled report generation, replacing hours of recurring manual work each week.
- Coordinated cross-team engineering projects and technical documentation for initiatives impacting **40,000+** campus users.

Software Engineer, IT Service Desk Aug. 2024 – Jan. 2026
University of California, San Diego *La Jolla, CA*

- Developed a full-stack **MERN** scheduling and timesheet application deployed on internal infrastructure for **70+** employees.
- Implemented **RESTful APIs** and a relational schema handling scheduling logic, timesheet submission, and role-based access control.
- Assisted in the resolution of **2,000+** software, hardware, and network issues across campus over 16 months.

Projects

Axon — Flashcard Study App | *React, Node.js, Express, MySQL, Tailwind, JWT* Jan. 2026 – Present

- Built and deployed a full-stack platform with deck creation, recall-tracked study mode, quiz generation, and community sharing.
- Set up a **GitHub Actions** CI pipeline running lint and an automated test suite on every pull request, with branch protection blocking merges on failure; deploys to Railway on merge to main.
- Implemented **JWT** auth and a normalized MySQL schema; deployed to production on Railway with a React/Vite frontend and Express API.

Chronos — Service Desk Scheduling | *MERN Stack, MariaDB, Express, React, Node.js* Jun. 2025 – Jan. 2026

- Shipped a scheduling and timesheet web app in daily production use by **70+** IT employees.
- Developed a responsive React frontend with dynamic tables, role-based views, and API-driven live updates.

UCSDelivery — Campus Delivery App | *MERN Stack, MariaDB, Express, React* Sep. 2025 – Jan. 2026

- Led development of a campus delivery platform, mentoring **6 developers** through ACM UCSD with code reviews and technical direction.
- Integrated a Discord bot and real-time map-based order tracking to coordinate deliverers and improve transparency.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, SQL, HTML/CSS
Frameworks: React, Node.js, Express, Flask, Vite, Tailwind CSS, pandas, NumPy
Tools: Git, Docker, CI/CD (Bamboo), MySQL/MariaDB, MongoDB, Linux/Bash, Postman, Jira, AWS, GCP
Concepts: REST API design, authentication, relational schema design, LLM integration, Agile/Scrum
